EXCHANGE OF EXPERIENCES BETWEEN GDR AND CZECH INDUSTRIAL EXPERTS

an exchange of experiences between GDR (German Democratic Republic) and Czech industrial experts during the latters' visit to various GDR industrial plants.

The Czechs visited the following GDR plants: KWO (Oberspree Cable Plant) Berlin; EKM (Power Plant Machinery and Motor Construction) turbine plant in Dresden; PKE (Electrical Equipment, Projects and Construction ?) Bergmann-Borsig plant in Berlin-Wilhelmsruh; and the machine factories in Zella-Mehlis, Suhl, and Goerlitz.

The exchange of experiences relates to various production processes and methods encountered at the above plants, such as drilling techniques, construction and installation of turbines, and improvements in the construction of machine tools. The opinion is expressed that it would be desirable to send GDR industrial experts to visit Czech plants in order to get the benefit of the latest improvements carried out at the latter plants.
